Additional: energy waste reduction, renewable energy portfolio standard, distributed generation program, electric choice program, 10-month rate cases.
Resource Adequacy (SRM)

**2017**
- MPSC Initiates Cases
- Utility SRM Proposals
- Stakeholder meetings
- MPSC Order Issued

**2018**
- MPSC Final Orders on SRM
- IOU Capacity Filings
- MPSC Final Order Capacity Verification
- AES, Muni, Co-op Capacity Filings

**2018-2019 Planning Yr. Begins**
Capacity Demonstration

• Purpose: ensure all energy providers have electricity supplies over long term to reliably serve Michigan homes and businesses

• MPSC’s September 15 Order:
  • Must own or have contractual rights to capacity 4 years (2018-21) ahead
    • Year 1 - 100% can be acquired through MISO annual auction
    • Years 2-4 – providers can plan for ≤ 5% of capacity to be acquired in future MISO auctions.
    • No true-up; providers can buy/sell over 4 years as needed in MISO auction
  • No locational requirement for individual providers 2018-21; MPSC opening contested case on methodology that would apply to 2022 planning year
Energy Law Updates

Public Acts 341 and 342 were passed on December 15, 2016, and signed by Governor Rick Snyder on December 21, 2016. PA 341 updates Michigan’s energy laws relating to utility rate cases, electric choice, certificate of necessity, and electric capacity resource adequacy, and establishes an integrated resource planning process. PA 342 updates Michigan’s energy laws relating to renewable energy, energy waste reduction, and distributed generation, and allows utilities to implement on-bill financing programs. The laws take effect on April 20, 2017.

Below, you will find general information about implementation tasks, staff leads for each of the tasks, implementation status updates, and ways to keep informed of stakeholder engagement opportunities. Click here to receive email updates.

<thead>
<tr>
<th>Task</th>
<th>Description</th>
<th>Statutory Section</th>
<th>Staff Lead(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rate Case and Certificate of Necessity (CON)</td>
<td>The new energy law shortens the deadline for rate cases to be completed from 12 months to 10 months. It also removes the ability of utilities to “self-implement” new rates after 6 months if a final order has not been issued by the MPSC. Existing filing requirements need to be updated to account for these, and related, changes.</td>
<td>MCL 460.6a</td>
<td>Bill Stosik</td>
</tr>
<tr>
<td>Rate Case Filing Requirements</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Certificate of Necessity Filing Requirements</td>
<td>Electric utilities are able to apply to the MPSC for a Certificate of Necessity to obtain new electric generation resources. The new energy law made changes to these provisions, and existing CON filing requirements need to be updated to account for these changes.</td>
<td>MCL 460.6c</td>
<td>Naomi Simpson</td>
</tr>
<tr>
